1. Executive Summary

Company: New Legacy AI · Hamilton/GTA · newlegacyai.ca

Positioning: Booked jobs for local service businesses via website, Google Business Profile, and follow-up systems.

Current capacity: Can deliver **3 Launch projects/month** without burning out.

Stage: Late **Stage 2 (Advertise)** → early **Stage 3 (Stabilize)** on the [\\$100M Scaling Roadmap](#).

Strategic priorities (next 90 days):

Priority	Action
Focus	One avatar, one front-end offer, one primary paid channel (Meta)
Price	Move from \$1,700 commodity → \$2,997 Launch + \$497-997/mo Grow
Acquire	Meta ads → landing page → VSL → book call (Rule of 100: \$100/day)
Convert	Pre-call VSL + 6-day email sequence + speed-to-lead (<5 min)
Retain	Grow tier, ascension to Scale (\$5k+ CRM), referral credits
Team	VA first (\$550-750/mo), commission cold callers, no salaries until MRR covers VA

North star: "We help local service businesses in Hamilton/GTA get more booked jobs from Google and their website — without hiring admin."

2. Stage Assessment

Where we are on the roadmap

Stage	Name	Headcount	Role	Constraint	New Legacy AI fit
2	Advertise	0–1	Doer	Inconsistent leads	Meta + cold call in place; need one channel focus
3	Stabilize	1–4	Trainer	Too much for one person	Current stage — document, hire VA, qualify leads
4	Prioritize	5–9	Manager	Trying to serve everyone	Risk: 7 verticals, 6 service pillars — narrow now

Sources: [Stage 3 PDF](#), [Stabilize training](#), [Leila Hormozi Ep 350](#).

8-function scorecard

Function	Status	Next fix
Product	Website+GMB productized; CRM custom	One flagship: Booked Jobs Launch System
Marketing	Meta tracked; no public pricing	Ads LP + 20 hooks × 1 avatar
Sales	Cold call → invoice flow exists	Qualification script + pre-call VSL
Customer service	Onboarding token flow	Week-1 quick win (GMB live)
Tech	Strong stack; leads fragmented	Unify <code>website_leads</code> into CRM UI
People	Roles defined in app	Hire VA + commission setter
Finance	Stripe + HST	Track CPQL, CAC, 30-day cash vs CAC
Strategy	Agency + DetailOps + portfolio	DetailOps = proof, not front-end offer

3. Offer Stack & Pricing

Stop selling · Start selling

Old	New
"Website + GMB — \$1,700"	" Booked Jobs Launch System " — \$2,997
6 AI service pillars	One outcome: more booked jobs
7 industry verticals	One avatar: Ontario local trades (detail, plumbing, HVAC, home services)

Hormozi value equation

Value = (Dream Outcome × Perceived Likelihood) ÷ (Time Delay × Effort)

Raise price by: specific outcome, proof without many logos, faster launch (14 days), done-for-you delivery.

Trim & stack — Launch (\$2,997 one-time)

Component	Anchor value	Delivery (templated)
Conversion website (1 page)	\$2,500	Demo-site template + QA
Google Business Profile setup	\$800	VA checklist
Missed-call text-back	\$600	n8n / SMS automation
Review request sequence (30 days)	\$400	Email/SMS templates
Lead response playbook	\$300	Doc + 30-min training
14-day launch guarantee	—	Process + VA
30-day support window	\$500	Email support

Stacked anchor: ~\$5,100 → **Price: \$2,997**

Optional: \$1,997 + 2 × \$997 (payment plan)

Grow tier (\$497–997/mo recurring)

- 4 GMB posts/month
- Review monitoring + responses
- Monthly lead report
- Speed-to-lead audit

Scale tier (\$5,000–15,000)

- Custom CRM / booking (DetailOps-style)
- **Cold outreach + sales calls should aim here** (Hormozi: cold economics favor \$10k+ tickets)

Proof without many case studies

Asset	Use
ShowRoom AutoCare funnel metrics	Before/after in ads + VSL
DetailOps (\$2M+ booked, 500+ detailers)	Product proof
Demo sites from cold-call flow	3 niche before/afters
Onboarding + contract process	Process proof
Founding Client Program	"5 spots at \$2,497 (normally \$3,997)"

Sources: [Ep 999 trim & stack](#), [Agency avatar video](#).

4. Scaling Phases & Budget

Phase A — Bootstrap (Month 1–2) · \$0–400/mo labor

Item	Cost
Apify, tools	~\$100/mo

Commission cold caller	\$0 base
Target: 2 Launch/mo @ \$2,997 = ~\$6,000/mo	

Phase B — Stabilize (Month 3–4) · \$800–1,400/mo labor

Hire	Cost	Role
Full-time VA (Philippines)	\$550–750/mo	CRM, GMB, onboarding chase
Web contractor	\$300–600/project	Template sites
Cold caller	Commission	100 dials/day
Target: 3 Launch + 2 Grow = ~\$10,000/mo		
Launch COGS: \$480–510 → **83% gross margin**		

Phase C — Scale (Month 5–8) · \$2,500–4,000/mo labor

Hire	Cost
VA (keep)	\$600–800
Account manager	\$400–800 or 5% MRR
Media buyer	\$500/mo + 10% ad spend
Closer (commission)	10% collected
Target: 4 Launch + 6 Grow + 1 Scale/qtr = \$15–20k/mo	

Break-even: 1 Launch sale funds VA for ~1 month. 2 Grow clients fund VA indefinitely.

5. Hiring: VAs, Platforms & Pay Structure

Where to hire (low capital)

Role	Platform	Rate
VA / admin / GMB	OnlineJobs.ph	\$550–750 USD/mo FT
Cold caller	OnlineJobs.ph, Upwork	Commission-only
Web dev	OnlineJobs.ph, Upwork, Contra	\$300–800/site
Media buyer	Upwork, local	\$500/mo + % spend
Canadian closer	LinkedIn, network	Commission-only

Rule: No salaries until **Grow MRR** ≥ **VA cost** ($2 \times \$497 = \$994/\text{mo}$).

Commission structure

Cold caller / setter

Event	Pay (CAD)
Qualified meeting booked	\$40–75
Meeting showed	+\$25–50
Deal closed (optional)	3–5% collected

Qualification checklist: Local trade, Hamilton/GTA, decision-maker, bad/missing web or GMB, can pay \$2,500+ in 14 days.

Closer: 10% of collected (Launch ~\$300, Scale 8–12% tiered).

Account manager: \$50/active Grow client/mo OR 5% MRR; \$75 onboarding bonus per on-time Launch.

VA KPIs: Assets collected <48hr, GMB live <7 days, zero missed follow-ups.

6. Lead Acquisition: Core Four

Hormozi's four channels: **warm outreach, cold outreach, content, paid ads**. Master **one for 90 days** before adding another.

Channel	New Legacy AI	90-day recommendation
Cold outreach	Apify + calling + demo sites	Keep as setter feeding Meta-qualified leads
Paid ads	Meta sync in CRM	Primary scale channel
Content	Case studies, site	Repurpose winners as ad creative
Warm	Portfolio clients	Referral program (Section 11)

Rule of 100: \$100 CAD/day Meta OR 100 cold touches/day OR 100 min content/day for 100 days.

Source: [Rule of 100](#), [Leila Ep 350](#).

7. Meta Ads Strategy (2026)

How the algorithm works (Andromeda + Advantage+)

- **Creative = targeting.** Meta reads hooks, visuals, and copy semantically — "If you own a plumbing business in Ontario" finds plumbers.
Sources: [Meta Andromeda official](#), [Chatterbuzz guide](#), [Hormozi 2026 strategy](#).
- **Creative diversity > audience hacks.** 10–15 *conceptually distinct* creatives per campaign. Headline swaps alone get collapsed into one "Entity ID."
Source: [Meta creative diversification](#).
- **Broad geo + Advantage+ Audience.** Tight radius (Hamilton/GTA); leave interests broad.
Source: [Advantage+ for services](#).
- **Learning phase:** ~50 conversion events before stable. Avoid >20% budget swings for 7–10 days.
- **CAPI + Pixel:** Send Lead, Schedule, and Purchase events from CRM — not just form fills.

Hormozi Meta tactics

Tactic	Application
Horizontal scaling	20–50 micro-ads at \$50–100/day each, one hook per trade/avatar
Hook–Meat–CTA	50 hooks × 3–5 bodies × 1–3 CTAs
Persona callouts	"If you're a Hamilton HVAC owner still getting leads from word-of-mouth only..."
Rule of 100	Start \$100 CAD/day for 100 days = ~\$10k test budget
Qualified > volume	Same CAC, 8× customer value when ads speak to real owners

Sources: [Horizontal scaling analysis](#), [Hook-Meat-CTA](#), [Qualified customers](#).

Lead forms vs landing page (for \$3k offer)

Metric	Lead form	Landing page + VSL
CPL (typical)	~\$30 CAD	~\$55–65 CAD
SQL rate	~8–15%	~27–45%
Cost per client	~\$1,300+	~\$400–650

Recommendation: Cold traffic → **landing page** (trust + qualification). Retargeting → testimonials + VSL.

Sources: [Instrumnt comparison](#), [AdLibrary service playbook](#).

Canadian benchmarks

Metric	Range (CAD)
CPL (service SMB)	\$20–90
Home services CPL	\$25–45
Min monthly spend	\$800–1,500
Target CPQL	< \$150
Target cost per \$3k client	< \$650 (4.6× ROAS)

Sources: [GrowthLab CA](#), [WordStream 2025](#).

Campaign structure

Layer	Budget %	Creative
Prospecting	60–70%	10–20 static hooks per trade
Retargeting (site, 25%+ video)	15–25%	Case studies, VSL clip, urgency
Testing winners	10–15%	New hooks, lookalikes from closed clients

Objective: Leads → landing page (not Traffic). Optimize for **Schedule** or qualified Lead via CAPI when possible.

Speed to lead

Contact within **5 minutes** (ideal: 60 seconds). Use SMS automation + closer alert.

Source: [Hormozi — Close More Leads](#).

Creative angles (starter hooks)

Avatar	Hook
Plumber, Ontario	"If you're a plumber still getting all your jobs from word-of-mouth..."
HVAC, GTA	"If your HVAC company doesn't show up on Google Maps when people search..."
Auto detailer	"If you own a detailing business and your website looks like it's from 2010..."
Home services	"If you're losing jobs to competitors with better Google reviews..."

8. Ads Landing Page Plan

URL (proposed): `newlegacyai.ca/booked-jobs` or `/launch`

Above the fold

- Headline matches ad hook exactly
- Sub: "Built for Ontario plumbers, HVAC, detailers & local trades"
- Hero: ShowRoom before/after OR GMB map pack screenshot
- CTA: **"Get Your Free GMB Visibility Audit"** or **"Book 15-Min Strategy Call"**
- Trust: review count, "14-day launch," Hamilton/GTA badge

Below the fold

1. **Pain:** "Your competitors show up on Google Maps. You don't."
2. **Solution:** What's in Booked Jobs Launch System (bulleted stack)
3. **Proof:** ShowRoom funnel stat + DetailOps metric + 1 demo-site before/after
4. **Process:** 14-day timeline graphic
5. **FAQ:** timeline, ownership, ongoing cost, "I already have a website"
6. **Second CTA** + tap-to-call `905-975-4877`

Form fields (qualification)

- Business name · Trade type · City · Phone · Email
- "Do you have a Google Business Profile?" (Yes/No/Not sure)
- "Monthly jobs/leads goal" (dropdown)
- "Ready to invest \$2,500+ in next 14 days?" (Yes/Not yet)

Technical

- Load <2s mobile
- Meta Pixel + CAPI + GA4
- Events: PageView, Lead, Schedule
- Thank-you page → **VSL + book call** (Section 9)

Build checklist (engineering)

- ☐ New route under `(marketing)` — match existing design system
(`MARKETING_CRM_DESIGN_SYSTEM.md`)

- ☐ Connect form → `website_leads` + CRM notification
- ☐ Calendly embed on thank-you page
- ☐ UTM params passed to CRM for ad attribution
- ☐ A/B test headline variants via Meta (not on-page split initially)

9. VSL Strategy (Ads + Pre-Call)

Hormozi uses VSLs in two places: **after opt-in** and **after call booked** (warms buyer, cuts no-shows).

Source: [VSL playbook](#), [How to create a VSL](#).

VSL A — Post-opt-in (5–8 min) · "Why Booked Jobs Launch System"

Section	Content
1. Identify	"If you own a local service business in Ontario..."
2. Problem	Losing jobs to competitors on Google Maps; slow follow-up
3. Mechanism	Website + GMB + missed-call text-back + reviews
4. Proof	ShowRoom + DetailOps screenshots (30 sec each)
5. Offer	What's included in \$2,997 stack
6. Guarantee	14-day launch
7. CTA	"Book your free strategy call — only open slots this week"

3-day rule: Only show Calendly slots within **next 72 hours**.

Source: [Stormy VSL playbook](#).

VSL B — Pre-sales-call (3–5 min) · "Before We Meet"

Send automatically when Calendly books:

- "Here's exactly what we'll cover on our call"
- FAQ: timeline, what you need to prepare, what happens after yes
- Reinforce guarantee + quick client win story
- "Add this to your calendar" + reminder to watch before call

Goal: Prospect arrives pre-sold on mechanism; call = fit check + close.

VSL C — Retargeting ad cut (60–90 sec)

- Hook + one proof + CTA from VSL A
- Use as Meta retargeting creative for LP visitors

Production plan (low budget)

- Founder on camera OR screen recording + voiceover
- CapCut edit · Teleprompter · Record in 1 session
- Host: Mux (you already use on acquisition.com-style pages) or unlisted YouTube/Vimeo embed

10. Email Sequences & Onboarding

Sequence 1 — Post-lead (didn't book) · 6 days

Day	Subject angle	Content
0	Instant	VSL link + audit promise
1	"Did you see this?"	Link to VSL / GMB audit
2	One insight	"Why Google Maps beats your website for local trades"
3	Case study	ShowRoom or demo-site before/after
4	Objection	"I already have a website"
5	Scarcity	"3 Founding Client spots left this month"
6	Direct	"Book your call — here's the link"

Source: [VSL email drip](#).

Sequence 2 — Pre-call (after book) · 3 emails

Timing	Content
Immediate	Confirmation + VSL B + calendar link
24 hr before	"Watch this before our call" + FAQ doc
2 hr before	"We're on in 2 hours" + what to bring

Sequence 3 — Post-close onboarding · 14 days

Day	Email	Action
0	Welcome to the team	Onboarding link /start/[token]
1	Kickoff prep	Asset checklist
3	"We received your assets"	Set expectations
7	Draft preview	Website/GMB progress
14	Launch day	Go-live + review request link
30	Check-in	Upsell Grow tier

Hormozi principle: Churn is a delivery problem. Quick win in Week 1 (GMB claimed + first review request).

Source: [Churn is a delivery problem](#).

FAQ doc (attach to all sequences)

- What's included / not included
- Timeline (14 days from payment + assets)
- Who owns the website
- Ongoing costs (hosting, Grow tier)
- What we need from you (photos, logo, login access)

Tools

- **Resend** (already in stack) or HubSpot if you want visual automation
- Trigger from: form submit, Calendly webhook, Stripe paid invoice
- n8n for glue (you already use for meeting booked)

11. Retention, Upsells, Referrals & Money Model

Hormozi Money Model target

Collect **2× CAC + COGS** in first 30 days.

Source: [Money Model](#).

Offer	When	Price	Purpose
Launch	Day 0	\$2,997	Core + cover delivery
Grow	Day 30	\$497–997/mo	Continuity + fund VA
Scale	Month 3–6	\$5k–15k	CRM/booking ascension
Review add-on	Month 3	\$200/mo	Attach to different "wallet"
Google Ads mgmt	Month 6	\$500–1k/mo	Lead gen wallet

"Buy more of what they bought" — X without Y

After Launch they have...	Next problem	Upsell
Great website	No traffic	Grow tier + GMB posts
GMB live	No reviews	Review management
Reviews flowing	Can't answer leads fast	Missed-call / AI text-back
More leads	Can't track jobs	Scale CRM (DetailOps-style)
Busy owner	No time for marketing	Done-for-you Meta ads mgmt

Sell at point of greatest deprivation — when leads pick up and they're overwhelmed, not when they're "happy."

Source: [Upsell playbook 2026](#).

Referral program

Mechanism	Offer
Refer a trade owner	\$500 credit toward Grow OR free GMB audit for referral
Two-sided	Referrer + referee both get "Priority launch slot"
Timing	Ask at Day 30 check-in (after quick win delivered)

Hormozi: incentivize enough to change behavior; best referrers = customers who got results.

Source: [Customer referrals — \\$100M Leads](#).

Retention mechanics

- Monthly lead report (proves ROI)
- Quarterly "GMB health check" call for Grow clients
- Founding Client community (optional Slack/WhatsApp — curate, don't babysit)
- **Referral to other owners they know** = easy value-add ("we'll audit your friend's GMB free")

Optional front-end ascension (later)

Local Visibility Sprint — \$297, 2 weeks, GMB audit + 5 quick wins → upsell to full Launch.

Gym Launch "paid challenge" model. Source: [Money Model — front-load cash](#).

12. 90-Day Implementation Plan

Month 1 — Offer + Ads foundation

Week	Tasks
1	Finalize offer copy · Pricing page · Founding Client offer (5 spots)
2	Build ads landing page · Pixel + CAPI · Form → CRM
3	Write 20 ad hooks · 10 static creatives · Launch Meta \$100/day
4	Record VSL A + B · 6-day email sequence in Resend/n8n

Month 2 — Optimize + hire

Week	Tasks
5–6	Kill losing ads · Scale winning hooks · Add retargeting 15%
7	Hire VA (OnlineJobs.ph) · SOPs: GMB, onboarding, follow-up
8	Hire commission cold caller · Unify leads in CRM UI

Month 3 — Retain + ascend

Week	Tasks
9	Launch Grow tier to all Launch clients · Referral program
10	First Scale pitch to best Launch clients
11	Lookalike audience from closed clients
12	Review CPQL, cost/client, 30-day cash vs CAC · Update this doc

Engineering backlog (CRM repo)

- ☐ /booked-jobs marketing landing page
- ☐ CRM page for website_leads + intake submissions
- ☐ Calendly → pre-call email trigger
- ☐ Meta CAPI events from form + Calendly

- ☐ Commission tracking fields on deals/meetings

13. Metrics Dashboard

Track weekly — **not vanity CPL alone.**

Metric	Target
Ad spend	\$100/day → scale winners
CPL	\$30–65 CAD
CPQL (qualified lead)	< \$150
Cost per booked call	< \$200
Show rate	> 70%
Close rate	> 25%
Cost per Launch client	< \$650
30-day cash vs CAC	≥ 2× (Money Model)
Grow MRR	Covers VA by Month 3
Launch delivery time	≤ 14 days
Referrals / month	1+ by Month 4
